

Quiz Application

A Django-based Timed Quiz Platform with Instant Scoring

Python Full Stack Project

- ▶ **Presented By:**
P. Chaitanya Deepthi
- ▶ **Department:** Computer Science and Engineering(Artificial Intelligence)
- ▶ **College:** *Annamacharya University*

Project Overview

- ▶ The **Online Quiz Application** is a web-based application developed using **Python Django** that allows users to register, log in, attempt quizzes, and instantly view their scores.
- ▶ The system automates the quiz process, eliminating manual evaluation and providing immediate feedback. It is user-friendly, secure, and suitable for educational institutions and online learning platforms.

Objectives

- ▶ Develop a secure online quiz platform.
- ▶ Allow users to register and log in securely.
- ▶ Display multiple-choice questions dynamically.
- ▶ Calculate quiz scores automatically.
- ▶ Show correct answers for incorrect responses.
- ▶ Provide an admin panel for managing quiz questions.
- ▶ Reduce manual evaluation and improve learning efficiency.

Project Workflow

Key Features

- ▶ Secure User Registration & Login
- ▶ Interactive Multiple Choice Quiz
- ▶ JavaScript Countdown Timer
- ▶ Automatic Score Calculation
- ▶ Displays Correct & Wrong Answers
- ▶ Django Admin Panel
- ▶ SQLite Database
- ▶ Responsive User Interface
- ▶ Easy Question Management

Future Enhancements

- ▶ Leaderboard
- ▶ Quiz Categories
- ▶ Quiz History
- ▶ User Profile
- ▶ Email Notifications
- ▶ Certificate Generation
- ▶ Mobile-Friendly Design
- ▶ Performance Analytics
- ▶ AI-Based Question Generator

Conclusion

The **Online Quiz Application** successfully automates the quiz process using Django. It provides secure authentication, dynamic quiz management, automatic score calculation, and instant result generation.

The project demonstrates the use of **Python, Django, HTML, CSS, JavaScript, SQLite, and Django Forms**, making it an excellent beginner-level Python Full Stack project.

THANK YOU!!
